

10th International Conference on Serpentine Ecology in Turkey

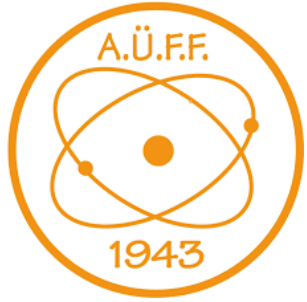

We want to organize 10th International Conference on Serpentine Ecology in TURKEY.

WHY TURKEY?

- ✓ Turkey is one of the most important countries which has a wide distribution of ultramafic rocks.
- ✓ Turkey is one of the most important countries from the view point of biodiversity and edaphic endemism especially on serpentine.
- ✓ Conference participants will have amazing trips on ultramafic rocks in TURKEY.

- ✓ Turkish Scientific and Research Council of Turkey (TUBITAK) will support the conference.
- ✓ Ankara University is the first and biggest university of the Turkish Republic will support to the conference.
- ✓ We are planning to organize the conference at SouthWest part of TURKEY in seaside, because there are lots of opportunities for accomodation, transporting and amazing ultramafic areas.

Distribution of serpentine soils on TURKEY

Turkey is very rich as regards to ultramafic rock and endemism which is the most important endemism center.

Hope to see you in TURKEY
